

Burners

Baker Thermal Solutions has been manufacturing their own burners since before you were born. We offer the original Tri-Zone™ Ribbon Burner that provides three zones of lateral heat adjustability, while optimizing BTU capacity.

High Capacity burners are also offered featuring up to 20% greater heat output. Baker Thermal Solutions burners, specifically manufactured for the baking industry, are available in varying lengths and offer thermal capacities from 200-1000 BTUs per inch of flame strip. These burners are specifically engineered for tray and tunnel ovens.

- Replaces Existing Burners
- Natural Gas or Propane
- Single Lateral Heat Adjustment Location
- External Ignitor Adjustability

Additionally, we offer 2" inch diameter burners for Lanham conveyORIZED ovens in both straight and chevron configurations.

With a broad assortment of accessory hardware, such as mixing valves, gas solenoids, ignitors and direct spark ignition controllers, Baker Thermal Solutions expertise can keep your operation running reliably and efficiently.

OVER 100 YEARS OF THERMAL EXCELLENCE
